STEM CROSS INFORMATION

This unique and beautiful cross serves as a contemplative reminder of Christ's presence available to each young man as he walks through the lobby of the Zupancic STEM building.

The center of the cross is a domed mirror which reflects the light of the sky as well as the visage of the observer. To look at the cross is to see one's own image and to ponder how Christ dwells in the heart.

But we all, with unveiled face, beholding as in a mirror the glory of the Lord, are being transformed into the same image from glory to glory, just as by the Spirit of the Lord. —2 Corinthians 3:18

The starburst on the cross is a sign of the Risen Christ. The gold-leafed apexes also represent the navigational points on a compass. When navigating the world with Christ as your compass your paths will be made straight.

Trust in the LORD with all your heart and lean not on your own understanding, in all your ways acknowledge him, and he will make your paths straight. —Proverbs 3:5-6

The steel of the cross is forged into rails and pins that reference the industrial history of Pittsburgh and the labor that built so many of our finest institutions and cultural heritage.

We hope you and your sons enjoy these reminders of God's great love and mercy for years to come.
